youtube.com/@VashuTheGreat

AI/ML Engineer specializing in Machine Learning, Generative AI, and MLOps. Experienced in developing ML models, building RAG and AI agent systems, deploying applications, and managing end-to-end machine learning workflows.

SKILLS

- **Technical:** Python, SQL, Machine Learning, Deep Learning, Generative AI, Agentic AI, RAG, LLMs, Prompt Engineering, NLP, Computer Vision, CI/CD, Deployment Pipelines
- **Tools:** Git/GitHub Actions, Jenkins, Shell Scripting, MLflow, AWS, Docker, Kubernetes, Linux, LangSmith, Grafana, Prometheus, FastAPI, LangChain, LangGraph, Redis, Claude Code

EXPERIENCE

AWS Cloud Club AKGEC

ML Developer

Ghaziabad, India

Oct 2025 – Present

- Build Machine Learning models using PyTorch and Scikit-learn while developing robust MLOps pipelines.
- Deploy end-to-end machine learning solutions on AWS Cloud using FastAPI.

CodSoft

AI Intern

Remote

Jul 2025 – Aug 2025

- Programmed a Facial Expression Recognition system and a Movie Recommender, improving prediction accuracy by 15% on validation datasets.
- Developed an NLP-based conversational chatbot from scratch using core Natural Language Processing techniques without external APIs.
- Delivered 5 AI/ML programming tasks involving structured dataset preprocessing and modular engineering pipelines.

Machine Learning Practice

AI/ML Developer

Remote

2024 – Present

- Possess 2+ years of hands-on experience in Machine Learning and Deep Learning using PyTorch, Scikit-learn, Pandas, NumPy and Matplotlib.
- Worked extensively on EDA, feature engineering, feature selection, PCA, dimensionality reduction, classification and regression problems.
- Developed and evaluated models including XGBoost, Decision Trees, Random Forests, SVM, Logistic Regression and Linear Regression.
- Built Computer Vision solutions using AlexNet, ResNet and Inception architectures.
- Developed backend applications using Flask, FastAPI, REST APIs.
- Worked with embeddings, semantic search, vector databases, LLM APIs, RAG Pipelines, retrieval systems.

PROJECTS

Transformer LLM from Scratch

Apr 2026 – May 2026

- Built a 124M parameter decoder-only Transformer in PyTorch, training it on a 15M-token dataset using Kaggle GPUs.
- Developed a custom BPE tokenizer and multi-head attention mechanisms from scratch.
- Verified Zero/One/Few-Shot learning, top-k sampling, and temperature configurations during inference.
- Created complete training pipelines and deployed the conversational model on HuggingFace.

Multi-RAG Pipeline

Jan 2026 – Feb 2026

- Designed a RAG system with advanced workflow patterns, custom chunking, and Corrective RAG techniques.
- Added Hybrid Search (Keyword + Semantic) and Re-ranking models, showcasing live chunk generation to users.
- Enabled parsing for multiple file formats containing tables, images, and text.
- Used LangChain, LangGraph, FastAPI, and LangSmith; deployed on HuggingFace via Jenkins CI/CD.

ML Learner Platform

Mar 2025 – Apr 2026

- Built an ecosystem with an AI Resume Builder, a Mock Interview Agent, and an ML training playground.
- Integrated an automated job finder and form-filler tool alongside a LeetCode-style ML coding console.
- Handled user authentication security and managed data storage layers using PostgreSQL.
- Developed backend and frontend using FastAPI, React, LangChain, and LangGraph frameworks.

E-Commerce Fashion Recommendation

Sep 2025 – Nov 2025

- Engineered a hybrid recommendation engine combining Agentic AI, vector search, and ML matching logic.
- Developed an interactive chat interface for real-time database discovery and personalized suggestions.
- Embedded Computer Vision capabilities to facilitate image-based product visual similarity searches.

EDUCATION

Ajay Kumar Garg Engineering College (AKGEC)

B.Tech in Computer Science (AI & ML) – Dr. A.P.J. Abdul Kalam Technical University

Ghaziabad, India

Expected Jun 2028

- Secured 1st Rank in two technical campus hackathon events.

EXTRA-CURRICULAR

- Solved **100+ algorithmic coding problems** consistently across LeetCode and NeetCode platforms.
- Served as Core ML Developer for Team Kryptonite at Hyperspace Hackathon, integrating YOLO architectures and Gemini APIs.
- Maintain a dedicated tech YouTube channel publishing step-by-step code walkthroughs for advanced engineering projects.
